“Our original software couldn’t do what Space claim can , I really couldn’t function without SpaceClaim”

**Robb Barrett, Advanced Manufacturing Fablabs
Manager – Sainsbury Wellcome Collection Centre**

CASE STUDY

Goals/Challenges/Requirements

- We needed a solution for editing organic shaped meshes successfully
- Our requirements were fast easy editing of complex scans
- The challenges we face are dealing with complex Scientific tool design
- We needed a package that is easy to pick up
- We needed easy access to learning tools and hands on proactive support
- We use it for importing multiple file types, reverse engineering, sheet metal, general design, jig and fixture design and mesh repair

Results

- We were quicky up and running with impressive results
- We markedly reduced editing and designing time
- Space claim is now our main design editing tool
- Space claim eliminated many hours of frustration when attempting STL and mesh repair

Working with Us

- I was unaware of Space claim until we saw a Demo at a trade show and was immediately blown away
- We have been using the product Space claim 3 years
- The support can only be described as fast & their answers are concise and accurate.
